

JOSHUA CARBON

IT SPECIALIST

IT Support • Hardware & Networking • Systems Troubleshooting

jacarbon06@gmail.com • +63 991 286 9067 • Manila, Philippines • [joshua-carbon-portfolio.netlify.app](#) • [linkedin.com/in/joshua-carbon](#)

SUMMARY

Computer Engineering graduate with hands-on experience across IT troubleshooting, hardware/software support, and networking. Configured and deployed a customer Piso WiFi network end-to-end — physical setup, TP-Link wireless configuration, Omada Web Controller administration, and the client GCash payment workflow. Builds and troubleshoots desktop computers, and has additional hands-on hardware/embedded experience through freelance prototype work and an automation-systems internship, backed by software and system-integration skills.

SKILLS

IT Support: Hardware & Software Troubleshooting, PC Assembly & Maintenance, Software Installation, System Configuration

Networking: LAN, Wi-Fi, TP-Link, Omada Web Controller, Router/Network Device Configuration, Piso WiFi Systems

Hardware & Systems: Arduino, Raspberry Pi, ESP32/ESP8266, Sensor Integration, Embedded C, PCB Design

Programming: Python, C#, C++, C, Visual Basic, TypeScript

QA & Debugging: Manual Testing, Debugging, Robot Framework, Selenium

Tools: Cisco Packet Tracer, Git, GitHub, Microsoft Visual Studio, Microsoft Office, Postman

SELECTED PROJECTS

PC Building & Hardware Troubleshooting — Built and configured desktop computers, including hardware assembly, component installation, software setup, and hardware/software troubleshooting.

Smart Parking System — Built an IoT parking-occupancy monitoring system using sensors and an ESP8266 controller, displaying real-time slot availability through a Blynk mobile app.

MotorPH Payroll Management System — Developed a desktop payroll system in C# and Windows Forms covering employee records, attendance, payroll computation, leave management, and reporting.

FREELANCE / CLIENT PROJECTS

Piso WiFi Network Setup & Management — Freelance client project. Configured and deployed a client Piso WiFi network, handling physical network setup, TP-Link wireless configuration, Omada Web Controller administration, portal and voucher configuration, and the client's GCash payment workflow.

Thermal Therapy Device Prototype — Freelance client project. Contributed to the design and fabrication of a Peltier-based hot/cold thermal therapy prototype, supporting the thermal control system and prototype testing/evaluation.

Automated Wallpaper Applicator — Freelance client project. Contributed to the product design and an Arduino-based automation concept for a motor-driven wallpaper-cutting mechanism, supporting Fusion 360 virtual prototyping across multiple design revisions and the accompanying technical documentation.

EXPERIENCE

Intern / OJT — Erovoutika Robotics and Automation Solution | May 2023 – Aug 2023

- Worked alongside engineering teams to troubleshoot technical issues across automation systems and embedded components.
- Performed debugging and calibration on automation units, supporting consistent performance during operation.
- Supported integration of sensors and embedded components into robotics and automation systems, including research/development work on a line-following robot.
- Authored technical documentation covering setup, calibration, and troubleshooting procedures for engineering reference.

EDUCATION

Bachelor of Science, Computer Engineering — Mapúa University | 2019 – 2025

Bachelor of Science, Electrical Engineering — Mapúa University | 2014 – 2019
