SUMMARY

Computer Engineering graduate with a software development foundation and hands-on QA automation experience. Built a reusable web automation framework using Python, Robot Framework, Selenium, and SeleniumLibrary, covering test design, automated execution, reporting, and debugging. Also delivered a real client software platform (AIQUANTA) and built AI-enabled tools, giving practical exposure to the systems being tested as well as the testing process itself.

SKILLS

QA & Automation: Robot Framework, Selenium, SeleniumLibrary, Manual Testing, Test Case Design, Debugging

Programming: Python, C#, C++, C

Software Development: OOP, Windows Forms, Software Testing, Quality Assurance

Web Development: React, TypeScript, Vite, React Router, HTML, CSS

Tools: Git, GitHub, Postman, Microsoft Visual Studio, Visual Studio Code

AI / Test Analysis: OpenAI API-assisted test-result analysis (optional)

SELECTED PROJECTS

QA Automation Framework — Built a reusable web automation framework using Python, Robot Framework, Selenium, and SeleniumLibrary, with reusable automation components, automated test execution, and reporting.

MotorPH Payroll Management System — Developed a desktop payroll system in C# and Windows Forms covering employee records, attendance, payroll computation, leave management, and reporting.

Inventory Management System — Developed a C# / Windows Forms desktop application for managing product records and inventory workflows.

AI-Based Japanese Character Recognition using YOLOv5 — Trained a custom YOLOv5 model (Roboflow, Google Colab) and built a Python/OpenCV OCR pipeline on Raspberry Pi for real-time Kanji recognition — 95.33% accuracy across 50 Kanji classes and 150 test trials.

Personal Portfolio Website — Designed and built a React, TypeScript, and Vite portfolio site with React Router-based project case-study pages, a role-tailored resume selector, responsive/adaptive layouts, and technical visualizations; deployed to Netlify with iterative debugging and refinement.

RELEVANT CLIENT SOFTWARE EXPERIENCE

AIQUANTA Training Consultancy Services — Paid freelance/client project. Built a client-facing web platform (React, TypeScript, Vite) with a Cloudflare Worker HTTP API and D1 storage, authenticated admin tools, reporting, and AI-assisted inquiry handling — demonstrating full software delivery beyond frontend styling.

CompetencyIQ AI — Built an AI assistant using Microsoft Copilot Studio and prompt engineering to support workforce competency intelligence, structuring its behavior around employee profiles, training history, post-training assessments, technical certifications and expiry, training-needs analysis, audit/quality findings, and operational risk indicators.

EXPERIENCE

Intern / OJT — Erovoutika Robotics and Automation Solution | May 2023 – Aug 2023

- Collaborated with engineering teams to identify and troubleshoot technical issues across automation systems.
- Performed debugging, calibration, and functional testing on automation processes, helping catch and resolve issues before deployment.
- Assisted in integration testing of sensors and embedded components across automation initiatives.
- Documented test procedures and technical guidelines to improve consistency and knowledge transfer.

EDUCATION

Bachelor of Science, Computer Engineering — Mapúa University | 2019 – 2025

Bachelor of Science, Electrical Engineering — Mapúa University | 2014 – 2019
